WORK EXPERIENCE

ASTREAX

Software Developer

Tempe, AZ

May 2026 - Present

- Building DMV modernization software for the State of North Carolina using C#, Angular, and SQL as part of a cross-functional team at a GovTech company delivering ISO 18013-5 compliant digital identity solutions.
- Contributing to a platform modernizing citizen-facing government services, expanding on prior deployments for ADOT and AZ MVD.

NXPRO: NEXT GENERATION PROFESSIONALS

San Jose, CA

Software Engineering Intern

May 2025 - Jan 2026

- Designed and developed full-stack web and e-commerce applications using Java, Spring Boot, Angular, and JavaScript, implementing RESTful APIs and integrating third-party services (payment gateways, social media platforms) to enable seamless data exchange and support ecommerce workflows.
- Built predictive analytics solutions using Python, Pandas, and scikit-learn for projects including taxi trip duration prediction, movie recommendations, and healthcare analysis, preprocessing large datasets to derive actionable business insights.
- Conducted A/B testing and exploratory data analysis on marketing and customer behavior data, driving a 20% increase in conversion rates and 10% improvement in customer satisfaction while collaborating in Agile ceremonies with cross-functional teams.

NASA: PSYCHE MISSION (ASU – MARSTON THEATER)

Tempe, AZ

Software Engineering Intern

Sep 2025 - May 2026

- Built a scroll-driven 3D web app in React and Three.js to visualize NASA's Psyche asteroid mission; implemented autoscroll, distance scaling, and an informational footer as primary feature contributions.
- Modeled and integrated the Psyche asteroid as a textured GLB asset; contributed to a viewport-height-based camera spline system with configurable spin, orbit, and path animations.
- Deployed via GitHub Pages for NASA MIEA distribution; applied accessibility standards across a cross-functional team.

PROJECTS

CUDA-COACH – AI TUTOR FOR CUDA & PARALLEL COMPUTING | React, TypeScript, Flask, Python

Jun 2025

- Built a full-stack AI tutoring platform with React/TypeScript frontend and Flask RESTful API backend, integrating quantized Mixture-of-Experts models via Hugging Face to deliver code analysis while optimizing GPU resource management on the server.
- Implemented secure user authentication, session management, and role-based access controls to support scalable integration with university courses and bootcamps, enabling students to learn CUDA and GPU-accelerated workflows through interactive AI-powered guidance.

BLOOM - WELLNESS COMPANION | JavaScript, Node.js, OpenAI API, Socket.IO, MediaPipe

Apr 2025

- Developed an interactive web application that detects real-time user emotions using facial landmark tracking, enabling dynamic AR visualizations that reflect emotional states.
- Engineered a contextual AI journaling and chatbot system using OpenAI's API, integrated with a gamified wellness tracker featuring streak-based digital garden growth to deliver personalized mental health support and encourage daily emotional check-ins.

TEXTWISE - AI SMS LEARNING PLATFORM | Python, Flask, HTML, CSS, JavaScript

Oct 2024

- Developed an SMS learning assistant using Flask backend with responsive admin tools, integrating Twilio for SMS delivery/inbound handling and designing REST endpoints to manage content delivery and progress tracking for learners in low-connectivity environments.
- Connected OpenAI API to generate personalized explanations, quizzes, and follow-up questions tailored to user history; optimized API response paths and caching strategies, reducing average response time by 30% and improving responsiveness for users on slow networks.

TECHNICAL SKILLS

Languages: C, C++, C#, Python, Java, Javascript, TypeScript, HTML, CSS, SQL.

Frameworks/Libraries: JavaFX, React.js, Node.js, Flask, PyTorch, TensorFlow, Three.js

Applications: Figma, Git, MongoDB, Jupyter

DevOps & Tools: JUnit, AWS, Agile, Scrum, REST APIs, Jira, Linux, Docker

EDUCATION

ARIZONA STATE UNIVERSITY

Tempe, AZ

B.S. in Computer Science

Aug 2022 - May 2026

GPA: 3.95/4.00 (Summa Cum Laude)

Achievements & Leadership: Dean's list, NAU Scholar, Outstanding Leadership Award, President of Connecting International Communities (1500+ members), Teaching Assistant & Grader (1000+ students), Student Ambassador at Adobe, Campus Partner at Perplexity.

Relevant Coursework: Software Engineering, Data Structures & Algorithms, Machine Learning, Database Management, Operating Systems, Data Analysis.
